Dear all,

Apeejay Stya University (ASU) acknowledges your professional commitments and the need to improve your career prospects while being in the job. The University has, therefore, designed a **weekend (Sat, Sun) M. Tech program** for working professionals. Those keen, can commence their Masters right away by enrolling for the Winter Session (Jan 2012).

The curriculum for this M.Tech. program draws its structure from leading Ivy League universities across the globe. To ensure that the program is at par with the regular M.Tech. and covers the emerging technologies with a focus on industry-specific projects, the course has been spread over a span of 3 years. The varied M.Tech programs in the offing include:

1) **M. Tech. Electronics & Communications**

2) **M. Tech. Computer Science**

3) **M.Tech. Instrumentation & Control**

As a special incentive for ex-Apeejayites, the University has reduced the course fee to Rs. 1 lac per year (totalling 3 lacs), to be paid semester wise. The total program fee for the non-Apeejayites is Rs 3.5 lacs, to be paid semester-wise.

In addition, limited scholarships, to be considered on merit, would be available to needy students.

So, what are you waiting for! Simply get enrolled in the Winter admissions and reserve your seat to a promising professional career. For further queries, you may contact the Admissions Office or write a mail to the undersigned.

Looking forward to a great academic association
